iMotion® Direct Drive System

Function Control Panel

iMotion®
the passion to drive doors

TX9000 Sliding Door System: The TX9000 Slide Door System is the ultimate intelligent system. It incorporates state of the art iMotion® direct drive system technology with self-adjusting fully programmable iMotion® micro-processor control and on board diagnostics coupled with outstanding door profile design. The door systems are available in Outside Slide (TX9200) Inside Slide (TX9300) Telescoping Outside Slide (TX9420) and Inside Slide (TX9430) and in All Glass (TX9500).

Motion® 2301 Standard Duty Direct Drive: Created for long lasting efficiency and performance. The TORMAX iMotion® Direct Drive System has no gears to wear or no leaking oil or grease. No motor brushes, commutator or couplings to replace "Wear Free Drive Principle". The result is a long service life with the lowest total cost of ownership. The iMotion® drive is extremely quiet in operation, and offers self-adjusting programmable iMotion® micro-processor controller with advanced auto diagnostics, and plug and play features, which make installation and operation fast and simple. Applications with large or heavy doors, upgrade with the iMotion® 2401 Heavy Duty Direct Drive System.
